

Performance Commentary

SKAGEN Focus delivered a strong absolute return in August. Both Hitachi and Hitachi Construction Machinery were among the biggest contributors. Hitachi is leading the way in Japan in terms of adopting higher ESG standards, while its underlying business is well positioned to benefit from a global economic recovery. On the detractor side, junior gold miner Roxgold, gave back some of its earlier gains while US life insurer Lincoln National, despite a record-low valuation, is out of favour as low interest rates for longer are pressuring the outlook. We continued to add to our position in Japanese elevator producer Fujitec, following promising communication from the company regarding the need for a strategic review of capital allocation. We also added to our position in truck component maker SAF-Holland, which at current levels discounts an overly pessimistic outlook and is a prime beneficiary of a recovery in the sector. We trimmed our positions in China Unicom, OZ Minerals and Hornbach Holdings on strength and closed our position in Fortuna Silver Mines as the share price has more than doubled since inception in July 2019. We initiated a new position in Lotte Fine Chemical, which appears to be perceived as a commoditised chemicals producer but in fact holds several high margin assets in cellulose.

The fund is a concentrated global equity fund with a mandate to invest in all cap-sizes, geographies and sectors globally. With our concentrated portfolio of 30-35 core positions, we aim to generate absolute returns at a controlled level of absolute risk.
