Investment strategy

SKAGEN Focus is a high conviction equity fund that seeks to generate long-term capital growth by investing in a portfolio of global companies across the market capitalisation spectrum, with the majority of exposure invested in small and mid-cap companies. Subscriptions are made in fund units and not directly in stocks or other securities. The benchmark reflects the fund's investment mandate. Since the fund is actively managed, the portfolio will deviate from the composition of the benchmark.

Monthly commentary, August 2025

In the past month, global equity markets have steadily risen in local currency terms, albeit with a gradual increase in volatility. Political risks and concerns over rising indebtedness in several countries have continued to drive long-term bond yields higher.

The fund experienced some underperformance compared to the underlying equity markets. However, it was bolstered by our holdings in gold and silver mining, particularly due to the strong performance of our position in Aya Gold and Silver. Gold prices have reached new highs, and silver is approaching its record price level from 2011. Additionally, we observed robust performance from automotive parts producers Brembo and Adient, as the market is now better able to account for tariff dynamics.

French homebuilder Nexity lost all its gains following a strong earnings report due to renewed political turbulence in the country.

In line with our disciplined, price-driven investment process, we exited our holding in Japanese regional bank Hyakugo Bank as the position reached our price target. We have also initiated a new position in the severely discounted and overlooked South Korean construction material conglomerate KCC.

Global small and mid-cap stocks continue to trade at a record discount to large/mega cap stocks, which presents a solid investment opportunity over the next 2-3 years, especially within discounted small-caps stock outside the still overly expensive US equity market.

Sustainability

SKAGEN's approach to sustainability

Our ESG approach is built on four pillars. In keeping with SKAGEN's active investment philosophy, our sustainability activities centre on active engagement with our holding companies, which is where we believe we can have the greatest impact. We recognise, however, that the full potential of a sustainable investment strategy is best realised when combining the following four pillars.

- ✓ Exclusion
- ✓ Enhanced due diligence
- ✓ ESG factsheet
- ✓ Active ownership
